 - Leadership (2023)
-

PROJECTS

Automated Operations Dashboard | Power BI

- Developed an automated Power BI dashboard to standarize and analyze daily operational data, covering operations, resource utilization, operators, and clients.
- Built data transformation and calculation processes to automatically clean, manipulate, and consolidate newly loaded data without requiring manual report preparation.
- Designed interactive daily, weekly, and monthly reports with dynamic tables, KPIs, and visualizations to monitor operational performance and identify trends.
- Identified data categorization errors through data-cleaning processes and collaborated with IT teams to correct issues in internal systems.
